and Machinists

24/7 Support
for Breakdowns and
In Plant Outages

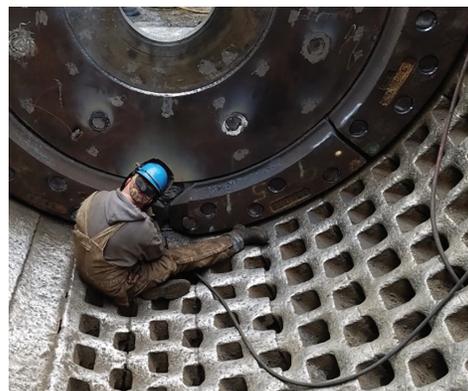

Save Downtime
with On-site Machining,
Alignment and Mechanical
Services

Save Money
with Regularly
Scheduled Maintenance

The skilled and experienced craftsmen at Precision Machine have a wealth of knowledge at their fingertips. In their capable hands, Precision Machine harnesses the power of the machining industry's most technologically sophisticated CNC & Manual equipment to make sure your manufacturing requirements are met with accuracy, speed and complete satisfaction.

- Mobile crews of highly skilled Mechanics, Welders and Machinists provide on-site labor to perform many different millwright tasks. Some tasks can be 100% completed on-site, while others require removing gearboxes, gear assemblies or other mechanical equipment from service, bringing it back to one of our regional repair centers, making the necessary repairs and reinstalling it.
- On-site machining and alignment services.
- Crews are regularly scheduled for in-plant outages and unplanned emergency breakdowns with 24/7 support.
- All of our self-sufficient crews travel to job sites in company trucks with well-equipped tool trailers.

Anywhere, anytime, any size job.

Precision Machine measures up to the highest possible standards.

GIVE US A CALL. PUT US TO THE TEST.
